

*Dear students, colleagues,*

this is a reminder for the 30th Edition of the Summer School of Information Engineering, SSIE 2020 (<http://ssie.dei.unipd.it/>).

SSIE will be held from the 13th to the 17th of July, 2020, in the beautiful town of Brixen (Bressanone) in the Italian alps. The school is co-organized by the IEEE Italy Section (with the technical sponsorship of several chapters) and by the Dept. of Information Engineering of UNIPD. This year the school will be focused on machine learning techniques, energy-efficient electronics and ICT applications, touching upon theoretical developments, bioengineering/biomedical applications, energy-efficient electronics and energy harvesting, engineering of movement, sensing and telecommunications systems and cyber-security, among others.

The speakers are prominent experts in their field and the program is truly rich and exciting. The school features two tracks (machine learning and applications and electronics), two plenary speeches ("quantum Internet" and "neural networks & mass-market micro-controllers") and a half-day student workshop (on July 16, 2020), where Ph.D. students will have an opportunity to present their recent/ongoing work.
